PROGRAM	LEVEL	DESCRIPTION
Addictions & Recovery	Level 1: Outpatient	Through the voices of experts in addiction medicine and psychology, along with people in recovery, this program provides straightforward introduction to the disease of addiction and assists the transition to recovery with the strategies and tools needed, when small choices can have big consequences, 20 modules.
Exploring Change	Level 1: Outpatient	Utilizes the psycho-educational model where the primary focus is to enhance the motivation for change. This is a 10-session model with a semi-structured format. Topics are ordered to generally follow the stages of change and the goal is to assist the participants to look inward for direction while being assisted with feedback from peers.
Acceptance & Commitment	Level 2: Outpatient	Utilizes psycho-education, group discussion, metaphors, and experiential exercises to gain psychological flexibility skills. Six core concepts are acceptance, mindfulness, diffusion, self-as-context, values, and commitment. Is utilized for mental health as well as substance use diagnoses.
Conflict Resolution	Level 2: Outpatient	Practical communication skills for preventing, managing, and resolving conflict with in-session practice. Will address how psychological needs and trust are basics in conflict development.  Incorporates how to utilize non-verbal communication, assertiveness behaviors, and boundaries.
Neurobiology	Level 2: Outpatient	Neurobiology of Addiction and Medical Aspect of Substance Use Disorders video provide basic information or how drugs and alcohol affect the central nervous system, particularly the brain and its chemistry. By utilizing the video broken into twelve sections along with the handouts, clients discuss the topics and engage in an effective educational hour.
Smart Recovery	Level 2: Outpatient	SMART Recovery incorporates The Integrative Model of Change, Rational Emotive Behavior Therapy and Solution Focus Therapy. There are three main objectives for this program, to engage the individuals in a therapeutic relationship and motivate change through education.
Criminal Conduct & Substance Abuse Treatment	Potentially assigned	An interactive program that looks at the interaction of substance abuse and criminal conduct to motivate change in adults, through cognitive behavioral therapy.
DUII	Potentially assigned	The DUII Education group uses the responsible decisions impaired driving program curriculum to provide accurate information about the effects of substance use on the mind, body and driving ability to help participants make responsible decisions about high risk behavior. Twelve-hour requirement to complete.
Essential Skills Group for Holistic Wellness	Potentially assigned	This group is comprised of 6 sessions, that will provide mental health skills for improving social interactions and living and integrated life.
Healing W/Trauma	Potentially assigned	Group focuses on how trauma effects the mind which leads to change in future responses. Also presents skills to utilize while healing from traumatic past. Intent is to assist participants in gaining insight and coping skills.
Mindfulness	Potentially assigned	Participants practice in session being in the present moment. Meditations are utilized with accompanying discussions as a group regarding their experiences. Is utilized for mental health as well as substance use diagnoses.
MRT	Potentially assigned	MRT is a systematic, cognitive-behavioral, and step-by-step treatment strategy designed to enhance self-image, promote growth of a positive, productive identity, and facilitate the development of higher stages of moral reasoning. Twelve steps to complete.
Relapse Prevention	Potentially assigned	This group allows participants to interact with others in recovery while gaining tools and strategies to use in sustaining their recovery. Alerts participants to the pitfalls of recovery and precursors of relapse and benefit from participating long-term group experience.
Skills for Life	Potentially assigned	"Skills for Life" - This group is comprised of 6 sessions that will provide mental health skills for improving social interactions and living an integrated life. This is for low acuity clients who are already enrolled.
Men's Group		Group focuses on issues that many men struggle with, especially if they are experiencing problems with drugs and alcohol. The program is organized into four sections: self, relationships, Sexuality and spirituality.
Coping w/ Anger		This group follows a CBT workbook and is similar to MRT but for anger. Can be used as court ordered anger management program.
Steps to Recovery		This group will follow some of the principles of NA. The group atmosphere will provide help from peers and offers an ongoing support network for addicts who wish to pursue and maintain a drug-free lifestyle.
DBT		
Grief Group		This is an 8-week closed group that will explore different types of grief and ways to cope with that grief.  This group offers a comprehensive approach to wellness, addressing various aspects of life. Wellness is the act of practicing healthy habits on a daily basis to attain better physical and mental health outcomes, so that instead of just surviving, you're thriving. This is a structured

Wellness Group	group therapy program that focuses on developing wellness across eight key dimensions: emotional, physical, intellectual, social, spiritual, occupational, environmental, and financial; Each stage of the therapy would delve deeply into one of these aspects, allowing participants to explore and improve their well-being in each area, leading to a more holistic approach to personal growth and overall health.
Adult Webex Group	https://chdinc.my.webex.com/chdinc.my/j.php?MTID=m25aef78f9f3faeaa070a37e643b3036e Behavioral health process group with a solution-focused and strengths-based approach for enrolled adult clients.
Group	benavioral meaning recess group with a solution recessed and strengths based approach for eliminate additional contents.
Self Esteem	Non-judgmental environment for group members to identify and address issues contributing to low self-esteem, build confidence, and develop health coping mechanisms.
